- 5. Включете повторно захранването и пуснете отново камера, за да я рестартирате.
- 6. Реконфигурирайте камерата.

БЕЛЕЖКА: Когато свържете вашата камера с вашия телефон чрез приложението YCC365 Plus, тя може автоматично да засече последната версия на фърмуер и да ви изпрати уведомление за ъпгрейд на наличния фърмуер. Можете да проверите актуализацията на фърмуер ръчно в страница "Настройки на устройството" в приложението YCC365 Plus. Ако приемете инсталацията за актуализация на фърмуеър, уверете се, че вашата камера е свързана с адаптера за захранване, преди да ъпгрейднете фърмуера. Не изключвайте камерата по време на процеса на ъпгрейд.

RJEŠAVANJE PROBLEMA I OBAVIJESTI

PITANJE: Zašto se kameru ne spaja s Wi-Fi mrežom ili je izvan mreže na neobičan način?

ODGOVOR

1. Trenutno kamera podržava 2.4G Wi-Fi mrežu s protokolom 802.11b / g / n. 5G Wi-Fi nije podržan.

2. Provjerite jesu li kamera i telefon na istoj signalnoj Wi-Fi mreži.

3. Provjerite je li mrežna Wi-Fi lozinka ispravno unesena prije skeniranja QR koda.

4. Provjerite je li napajanje i mreža normalno.

5. Ponovno uključite napajanje i ponovno pokrenite kameru, kako biste ih ponovno pokrenuli.

6. Ponovno konfigurirajte kameru.

NAPOMENA: Kada povežete kameru s vašim telefonom pomoću aplikacije YCC365 Plus, ista može automatski otkriti najnoviju verziju firmvera i poslati obavijest o nadogradnji dostupnog firmvera. Ažuriranje firmvera možete ručno provjeriti na stranici "Postavke uređaja" u aplikaciji YCC365 Plus. Ako prihvatite preuzimanje nadogradnje firmvera, provjerite je li vaša kameru priključena na strujni adapter, prije nadogradnje firmvera. Ne isključujte kameru tijekom postupka nadogradnje.

HIBAELHÁRÍTÁS ÉS MEGJEGYZÉSEK

KÉRDÉS: Miért nem csatlakozik a kamera a Wi-Fi hálózathoz vagy a Sub-normalhoz?

VÁLASZ:

1. Jelenleg a kamera támogatja a 802.11b / g / n protokoll 2.4G-os hálózati Wi-Fi-jét. 5G Wi-Fi nem támogatott.

2. Kérjük, győződjön meg róla, hogy a fényképezőgép és a telefon ugyanabban a hálózati Wi-Fi jelterületen van lefedve.

3. A QR-kód beolvasása előtt ellenőrizze, hogy a hálózati Wi-Fi jelszó helyesen van-e megadva.

4. Ellenőrizze, hogy az ellátás és a hálózat normális.

5. Csatlakoztassa újra a tápegységet és állítsa vissza a fényképezőgépet, hogy újrainduljon.

6. Állítsa be újra a fényképezőgépet.

MEGJEGYZÉS: Ha a fényképezőgépet a YCC365 Plus alkalmazáson keresztül csatlakoztatja a telefonjához, akkor automatikusan felismeri a legújabb firmware-t, és megkérdezi, hogy rendelkezésre áll-e új firmware-frissítés. A firmware-frissítést manuálisan is ellenőrizheti a YCC365 Plus alkalmazás Eszközbeállítások oldalán. Ha elfogadja a firmware-frissítés telepítését, győződjön meg róla, hogy a fényképezőgépet a firmware frissítése előtt csatlakoztatta a hálózati adapterhez. A frissítési folyamat során ne kapcsolja ki a fényképezőgépet

RISOLUZIONE DEI PROBLEMI E NOTIFICHE

DOMANDA: Perché la videocamera non si connette alla rete Wi-Fi o è offline in un modo insolito?

RISPOSTA

1. Attualmente, la fotocamera supporta la rete Wi-Fi 2.4G del protocollo 802.11b /g/n. Il Wi-Fi 5G non è supportato.

2. Assicurarsi che la videocamera e il telefono siano coperti della stessa rete del segnale Wi-Fi.

3. Verificare se la password di rete Wi-Fi sia stata inserita correttamente prima di eseguire la scansione del codice QR.

- 4. Controllare se la corrente e la rete siano normali.
- 5. Reinserire la corrente e ripristinare la videocamera per riavviarla.
- 6. Riconfigurare la videocamera.

NOTA: Quando si collega la videocamera al telefono mediante l'applicazione YCC365 Plus, è possibile rilevare automaticamente la versione più recente del firmware più recente e chiedere una notifica di aggiornamento del firmware disponibile. Inoltre è possibile verificare manualmente l'aggiornamento del firmware nella pagina "Impostazioni del dispositivo" dell'applicazione YCC365 Plus. Se si accetta l'installazione dell'aggiornamento del firmware, assicurarsi che la videocamera sia collegata all'alimentatore prima di aggiornamento.
