VT-5147	8469	1 Meter	ABS	IP65	DC:5V	50/60Hz

## INSTALLATION

**eWeLink APP:** Download eWeLink APP by going to APP Store or Google Play Store (OR) Download the eWeLinkAPP by scanning the below QR Code

GOOGLE PLAY

IOS

FAQ

Multi-Language  
Manual

**Note:** For troubleshooting please scan the Barcode of FAQ and to read the instruction manual in a different language please scan the barcode of Multi-Language Manual

## Wiring

- 1) Cut Off the Power.
- 2) Connect the wires correctly.
- 3) Install and power it up.

**Note:** The below two items are compatible with V-TACs Temperature Humidity Scheduler. These can be connected directly with the device.

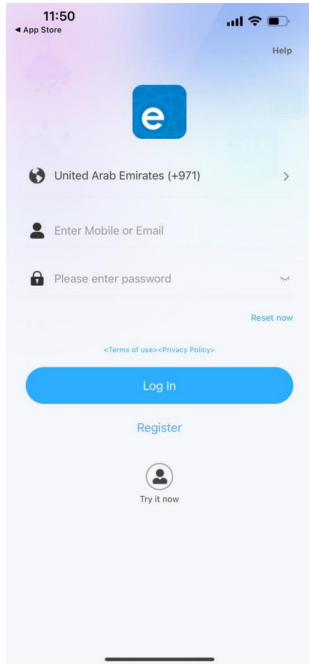

Temperature &  
Humidity Sensor  
(VT-5146)

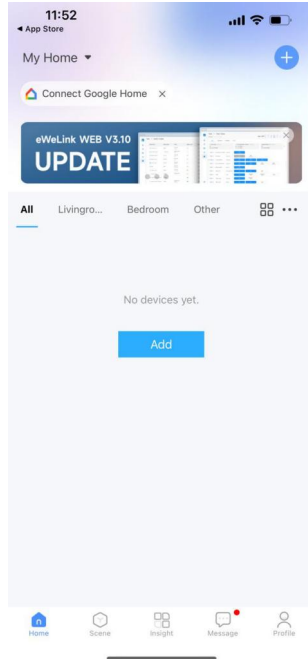

Temperature  
Waterproof Probe  
(VT-5147))

**Step1: Open the eWeLink App and register. If you already have an existing account with eWeLink, please proceed to logging in.**

**Step2: To Add a New device tap on the “+” sign(as shown)**

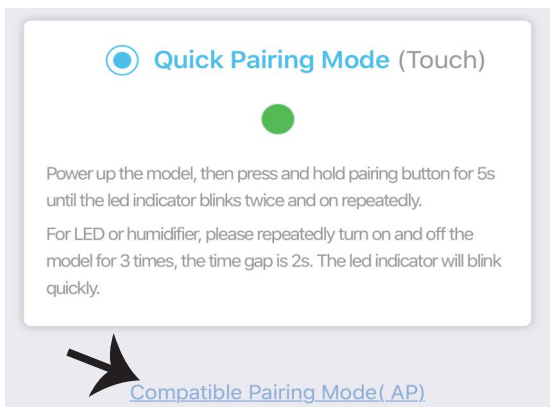

**Step3: Make sure your Smart Device is Powered.**

**1) Tap and Hold on the Power Button for 6 seconds to make the device available in Pairing Mode. Once in pairing mode the LED will start blinking 3 times repeatedly.**

**2)Tap on Next to start the pairing of device with the app. (Shown in the image)**

**Note: If you are facing any trouble while pairing in Quick Pairing mode please try to pair the device in Compatible Pairing Mode (Click on the link as shown on the image).**

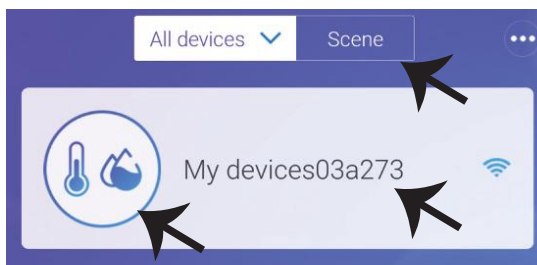

**Step4: Select your Wifi Name and enter the password and Tap on Next.**

**Step5: Give a Name to your Device (Ex: Temp Humidity Switch) & Tap on complete.**

**Step6: Your Device is now paired and will appear as shown below example image**

Temperature Humidifier, can be used as a normal Wifi Switch(On/Off) and also can be connected with probe temperature sensors (VT-5146 Or VT-5147) to detect the Temperature and Humidity.

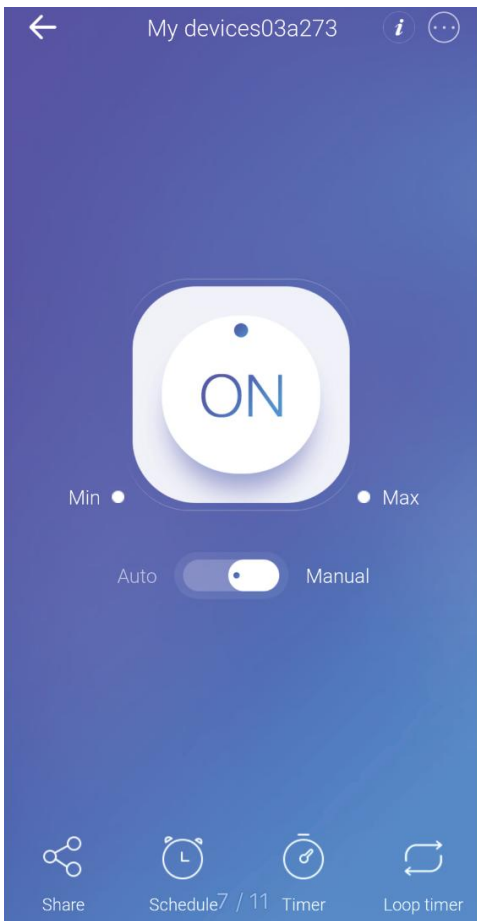

**Note: The Temperature value displays on the APP only when the Sensor is connected.**

**Sensor Connection Functions:** Once your device is connected with the sensor and paired with the APP it will display temperature and humidity values, and it can be set to Auto mode.

**Scene Mode:** You can use V-TACs Temperature Humidity Scheduler(Not Included) to collect temperature value and set a temperature to turn on/off several types of other switches (such as V-TACs Smart Plug, Smart Power Strip etc) Example: You can set a condition stating when the temperature reaches 24 degrees turn on the smart Plug. **Note: The V-TACs Temperature Humidity Scheduler should be in manual mode, not auto mode. When the real-time temperature is across the preset temperature range, it will trigger the condition.**

**Step7: On the Deice page eWeLink offers multiple features as mentioned below**

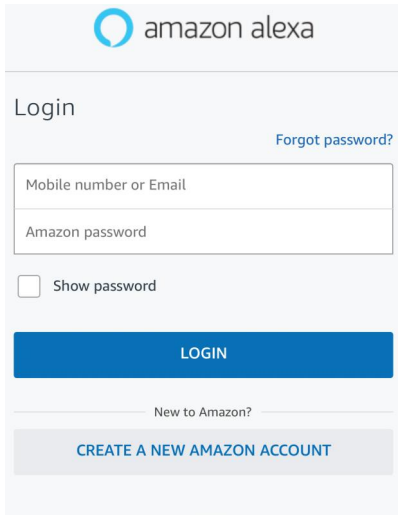

- a) Share** - This function allows you to share the access with another user.
- b) Schedule**: Schedule timer allows you to turn the device ON/OFF with flexibility of choosing date and time. This feature also allows Repeat mode using which you can set the desired configuration to daily OR any day of the week.
- c) Timer** : Timer function allows you to set “day-Hour-Minute” using which you can Schedule the device to Turn ON/OFF
- d) Loop Timer** - This function allows you to set a time loop for how long should the device be ON and after how long the device should be turned off.

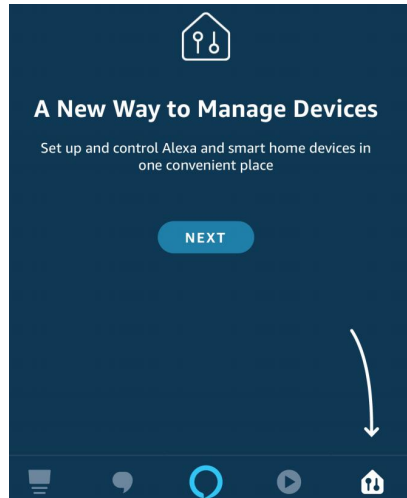

## ALEXA SETTINGS

**Step1:** Install the Amazon Alexa app via the App Store (iOS) or the Play Store (Android) and register. If you already have an existing account with Amazon Alexa, please proceed to logging in.

**Step2:** Once you are on the Amazon Alexa home page, tap on the lower right icon — where the arrow is pointed— to add a new device and Enable Skills.

The screenshot shows the Amazon Alexa app's login interface. At the top is the Amazon Alexa logo. Below it is a 'Login' section with a link for 'Forgot password?'. There are two input fields: 'Mobile number or Email' and 'Amazon password'. Below these is a checkbox labeled 'Show password'. A blue 'LOGIN' button is positioned below the inputs. At the bottom, there is a link for 'New to Amazon?' and a button labeled 'CREATE A NEW AMAZON ACCOUNT'.

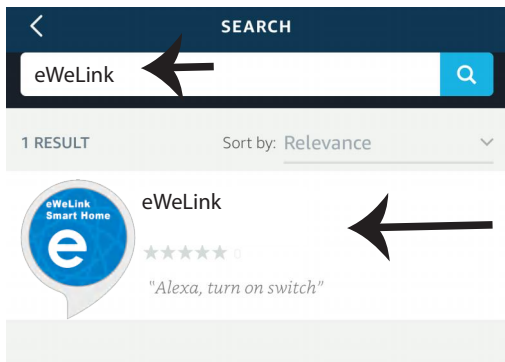

**Step3:** On the Home page of Amazon Alexa App, Tap on the icon as shown on the image below.

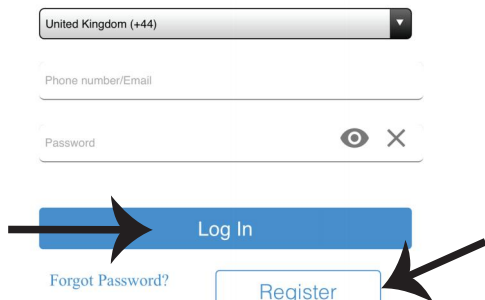

**Step4:** Tap on “Skills & Games” as show below

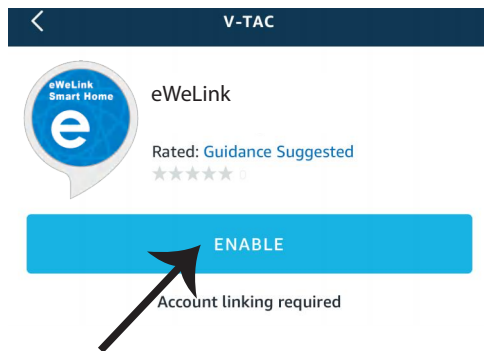

**Step5: On the Search bar as shown below type "eWeLink" and tap on the eWeLink skill as shown on the image.**

**Step7: Enter Login credentials of eWeLink and then tap on Log In. If you do not have a existing account please register by tapping on the register.**

**Step6: Tap on Enable Skill to link eWeLink app with Amazon Alexa.**

**Step8: a)Once you have successfully linked eWeLink Skillclose the window & (b)tap on Discover device. Make sure Smart device is paired with eWeLink Home app.**

a) 

**V-TAC has been successfully linked.**

What to do next:

→ Close this window to discover smart-home devices you can control with Alexa.

b)

**Step9: Discover your smart device on Alexa.** You can say”Alexa discover devices” to the Alexa device which you have.(OR) you can add new devices manually by going to the home page of Amazon alexa and tapping on the icon  (Ref:image A) & tap on “+” sign to add new device(Ref: Image B). Once the device is discovered you can now control your smart device using Alexa.

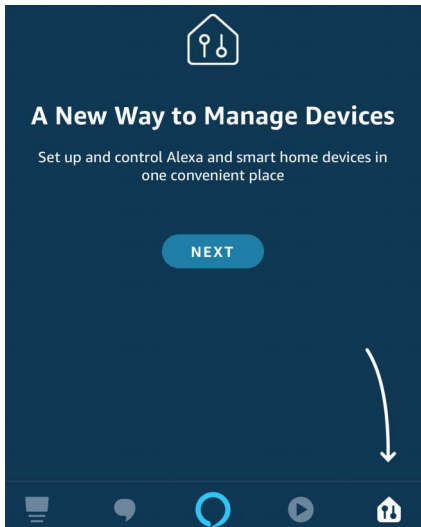

Image A

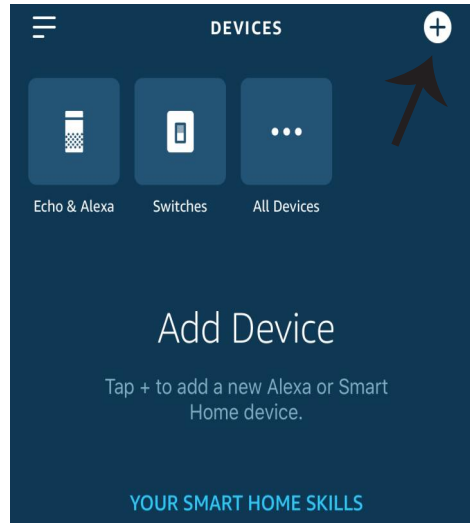

Image B

*Note: Discovering the device must be done every time the device’s name is changed on the app.*
